

AsTTle Number – Year 5, Term 4

AsTTle is a useful assessment tool for us as it provides detailed guidance on what a student has achieved strengths, weaknesses and gaps in their progress. However – we are very mindful that some students find the tests quite gruelling and when taken for the first time the results can be affected by the daunting nature of the test.

Specific information on your child’s level will be shared at parent teacher interviews. You may also wish to refer to the school “Reporting to Parents” booklet. These have been distributed to parents and are also available in Ultramet.

The graphs below show the performance of students in the year group set against the current national average.

Overall Maths Levels
